Gaia-X will be the basis for a digital ecosystem in which data and services can be made available, integrated/merged, shared and used securely and with an ultimate level of trust.

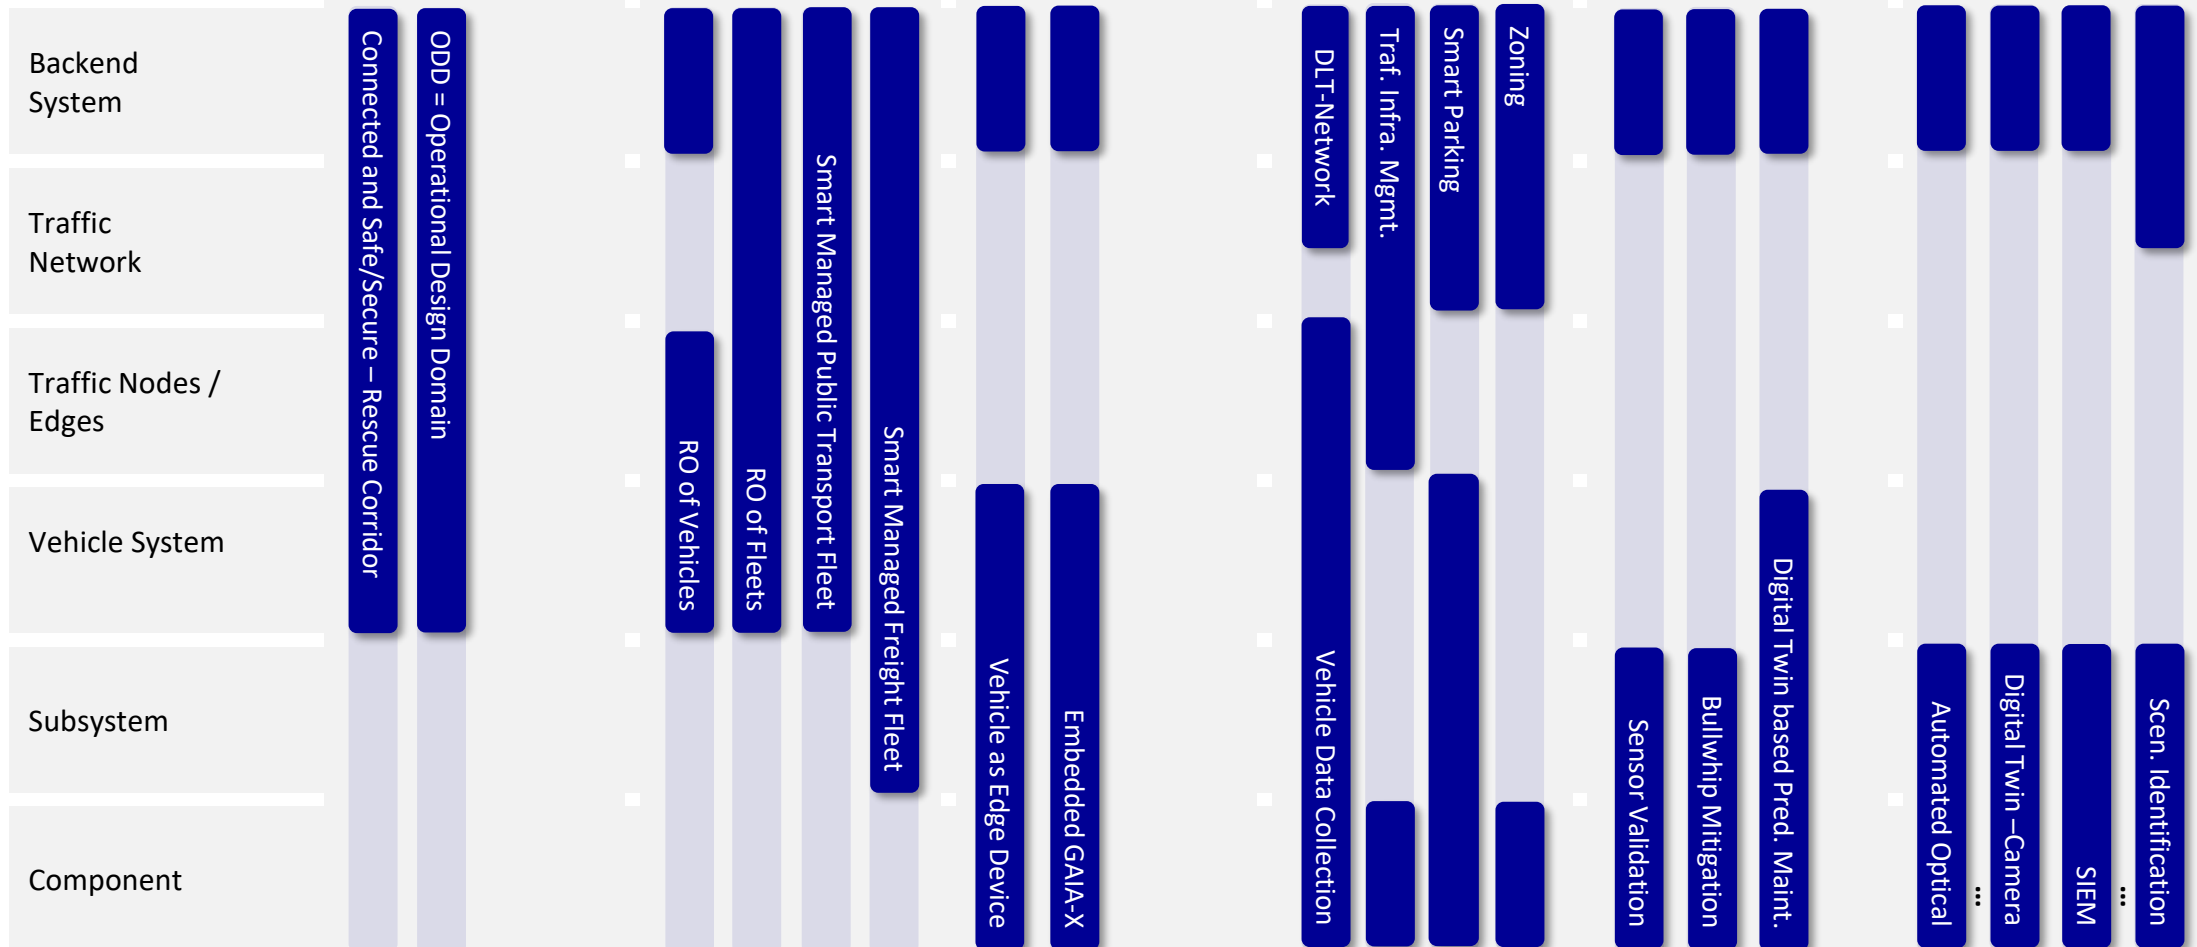

Based on European values, Gaia-X implements the following guiding principles:

- European data protection principles
- authenticity and trust
- openness and transparency
- sovereignty and self-determination
- free market access as well as European stability and growth
- modularity and interoperability
- usability

European/international visibility and impact

Use-cases on
different
system levels
